

# Tina Huang

[tina.huang@aya.yale.edu](mailto:tina.huang@aya.yale.edu)

## EDUCATION

### Yale University, School of Forestry & Environmental Studies

*Master of Environmental Management*

New Haven, CT

May 2019

### University of California, Berkeley

*Bachelor of Science in Environmental Economics and Policy, Society and Environment, Minor in City and Regional Planning*

Berkeley, CA

May 2017

- College of Natural Resources Dean's Honors (top 4%)

## PROFESSIONAL EXPERIENCE

### Independent AI Builder & Coach

Hangzhou, China

2026-Present

*Independent Practice*

- Built and launched four AI products from concept to deployment: Smoke Story (wildfire intelligence), True Zero (climate benchmarking), NoThanks (workplace boundary-setting), and Climate Triple Takes (climate communication), using Claude Code, Codex, Next.js, Vercel, and satellite data APIs.
- Since May 2026, coached nearly 40 adult and youth learners through customized, project-based programs built around their own work, research, and creative goals; helped them produce a working first version during live sessions and continue iterating between sessions.

### NewClimate Institute

Berlin, Germany

April-Sep 2024

*Climate Policy Analyst*

- Led research design and delivery on the role of environmental attribute certificates for corporate climate strategies.

### Boston Consulting Group

Toronto, Ontario, Canada

June 2021-August 2023

*Senior Knowledge Analyst, Climate & Sustainability*

- Go-to knowledge team expert on climate policy and science; core member of the BCG Center for Climate & Sustainability Policy & Regulation. Created and deployed tools and knowledge assets on IPCC climate science, North American climate trends, Article 6, NDC/LTS benchmarking, and major climate reports ahead of COPs.
- Provided analytical insights for climate and environment cases for public- and private-sector clients, including a national NDC and long-term strategy, a bank climate transformation, corporate net-zero roadmaps, climate strategies, and a national adaptation plan.
- Served as an expert on corporate GHG accounting, target setting, and decarbonization, drawing on CDP, SBTi, and GHG Protocol methodologies.
- Led and supported analysis for external publications on renewable energy in national climate plans (IRENA), the state of climate action after COP26 (World Economic Forum), and BCG's COP27 Executive Perspective.

### World Resources Institute

Washington, D.C., USA

Jan 2020-May 2021

*Research Analyst, Global Climate Program*

- Conducted rapid-response analysis of updated Nationally Determined Contributions ahead of COP26 on Climate Watch; led NDC-SDG linkages analysis and modeled target emissions. Co-authored a technical note quantifying 2030 emissions reductions from enhanced NDCs.
- Managed quality checks for GHG inventories, climate resilience, and socioeconomic datasets used to communicate climate data and visualizations to an average of 20,000 monthly website visitors.
- Spoke with journalists and academic institutions about climate insights; quoted by Reuters and Business Insider and invited to speak at Duke Law School. Published WRI Insights articles.
- Prepared research outputs for leadership and the Climate Program, led production of the monthly Climate Watch newsletter for 5,000+ readers, presented the program externally, and managed official inquiries.

### World Resources Institute

Washington, D.C., USA

June 2019-December 2019

*Data Team Intern, Science and Research*

- Acquired, cleaned, and processed geospatial datasets using GIS, Carto, Google Earth Engine, Python, and Excel; improved an API-query Python module and evaluated new datasets.
- Translated scientific technical notes into plain-language metadata and created geospatial visualizations for the Resource Watch platform.

## SKILLS & ACTIVITIES

---

**Languages:** English (Full Professional Proficiency), Mandarin (Native), Taiwanese (Native)

**AI Fluency:** Codex, Claude Code, ChatGPT, Obsidian, agentic workflows, prompt engineering, AI product development, Next.js, Vercel, API integration (OpenAI, Anthropic, satellite data APIs)

**Programming Languages:** Python, Google Earth Engine JavaScript, ArcPy, RStudio, Stata, SQL, CartoCSS, HTML
